Left panel is the HTML and Right panel is the page created by the HTML

- Empty the content on the left
- Type your name on the left. What happened?

Basic HTML Tags

We will use HTML Tags to tell the webpage how to display your name Instructions: Use each tag with your name

Heading: <h1> </h1>

Creates a heading (bigger text) in the page. Can go from ${\tt <h1>}$ to ${\tt <h6>}$

- Using the <h1> tag, make your name big.
- Use <h3> instead of <h1>. What happens?

Bold: Bolds the text

> • Using the tag, make your name bold

Underline: <u> </u> Underlines the text

• Using the <u> tag, underline your name

Italic: <i> </i>Italicizes the text

• Using the <i> tag, underline your name

Nested Tags

How do we make our name bold AND italic?

We do this by **nesting** the tags

• First, make your name bold

 Big Foot

• Then, make the entire thing italic by adding the <i> tag around it

<i> Big Foot </i>

More Activities:

- Make your name a heading and make it underlined
- Make your name a heading using <h2>, and make it underlined and bold
