## HTML TAGS: WORKSHEET #3

Image attributes: width, height, border

Width and Height attributes: <img src="url" width="100" height="50">

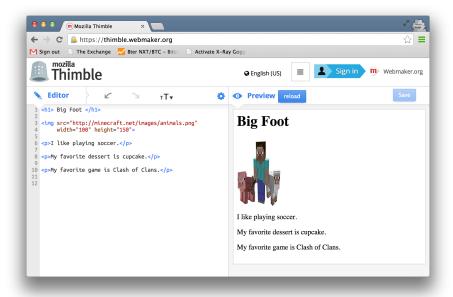

• Let's stretch the image horizontally by adding the width and height attributes. (The width value, 150, is larger than the height, 50)

```
<img src="http://minecraft.net/images/animals.png"
width="150" height="50">
```

Let's stretch the image vertically (the height is larger than the width)

```
<img src="http://minecraft.net/images/animals.png"
    width="100" height="150">
```

Let's stretch the image vertically as far as we can.

## Border attribute: <img . . . border="10">

Let's add a border attribute with a value of 10 pixels wide.

```
<img src="http://minecraft.net/images/animals.png"
width="100" height="150" border="10">
```

Let's make a border as thin as possible. How about as thick as possible?
