Worksheet#2: Intro to Javascript

Terms we need to know

Variable: a container for values

```
var myName;
var myAge;
```

Assignment: putting a value into a variable

```
myName = "Benno";
myAge = 28;
```

Evaluate: to figure out the value of some Javascript code

```
2 + 3

Evaluates to: 5

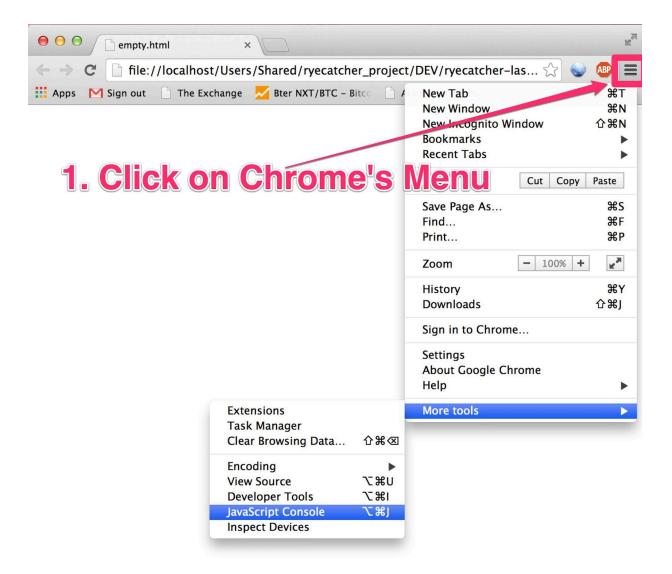

"My name is " + "Benno"

Evaluates to: "My name is Benno"
```

Let's combine them all together:

```
var myName = "Benno";
var greeting = "Hello! My name is " + myName
```

1. Open the Javascript console in Google Chrome

2. Type in the console

var name = "Benno"; var greeting = "Hello " + name;

alert(greeting);
