# WORKSHEET #2: Let's Share!

Hyperlinks with anchor tags, List of elements

Anchor Tag: `<a> </a>`

- Let's create a new page on neocities.org, called **share**.html (please, use this name!)

- Let's go the dashboard of neocities and find all the pages of your site in **My Files**

- Write down the whole list of the HTML file names into the share.html page (you can skip not_found.html)

  In my case, I have:

  askFavorite.html
  askFavoriteJquery.html
  card.html
  circularBox.html
  haunted-house.html
  madlibs.html
  shapes.html

- Let's create the corresponding links to those pages.

  For example, for **card.html**, it would be:

  ```
  <a href="card.html">Check my awesome Christmas card!</a>
  ```

  This page can be accessed directly by visiting:
  http://bronxnano.neocities.org/**card.html**

```
1   <style>
2     a { display: block };
3   </style>
4
5   <h1>My awesome work at Iridescent!!!</h1>
6
7   <a href="askFavorite.html">Ask for Favorites!</a>
8   <a href="askFavoriteJquery.html">Ask for favorites with jquery</a>
9   <a href="card.html">Check my awesome Christmas card!</a>      1. Example for linking to my card.html
10  <a href="circularBox.html">Circular Box</a>
11  <a href="haunted-house.html">Haunted House</a>
12  <a href="madlibs.html">MadLibs</a>
13  <a href="shapes.html">Shapes!!</a>
14
15  <h2>What I think of this programming experience</h2>
16  <p>
17    I think...
18  </p>
19
20  <h2>My favorite work is...</h2>
21  <p>
22    It was definitely                     2. Complete the <p> sections with your feedback
23  </p>
24
25  <h2>I struggled a little with...</h2>
26  <p>
27    This could be improved...
28  </p>
29
```

- Complete the **<p>** with your feedback and thoughts if you enjoyed this program!
